

I'm Interested in this job because I can see that in this role, my skills could help solve this problem within your company.

I also see an opportunity for me to learn and grow these skills, so we both would benefit personally, professionally and financially as I am already a 3x coder at codechief. Good amount of knowledge about new technology coming and I learn new thing very quickly that distinguish me from others. If I can come in here, and solve problems and accomplish your goals, I know I can develop my ~~little~~ career the way that I want to.

Also, I like the culture of this organization from what I've been reading about the company.

We all using the product of your company. So, I am really ^{excited} about part of such a company.
